**Porcelain**

RGB 255 / 254 / 250

# Variant Selection and Clearspace

Use the supplied standard SVG/PNG for most applications; tight variants are for constrained placements.

## Standard clearspace

The standard horizontal logo includes clearspace equal to 12% of the artwork height on every side. The emblem square master uses a 12% top and bottom safe margin and additional optical side space. Do not stretch, rotate, outline, shadow, recolor, or place the Burgundy mark over low-contrast backgrounds.

### Background rules

- Light surfaces: Burgundy Prime mark on Porcelain or transparent.
- Dark surfaces: Porcelain inverse mark on Burgundy Prime or another sufficiently dark field.
- Photography: use a solid brand panel when contrast is uncertain.
- Digital minimum: full logo 140 px wide; emblem 24 px. Use favicon exports below 24 px.

## Core file choices

| | |
|---|---|
| **SVG** | Master web and design source; infinite scaling. |
