IMAGE RIBBON PLACEHOLDER: PANORAMA OF HUMAN EXCELLENCE (HISTORICAL ACHIEVEMENTS)

Humanity's greatest promise is what people can become.

IMAGE RIBBON PLACEHOLDER: PANORAMA OF HUMAN EXCELLENCE (MODERN FRONTIERS)

FROM POSSIBILITY TO CAPABILITY.

Bayes creates the conditions in which human possibility becomes human capability.

DISCOVER

Uncover personal asymmetric leverage and target fertile problem lands.

DEVELOP

Build software products, master customer loops, and engineer real systems.

DIRECT

Command your own venture, win paying users, and stand on evidence.

DISCOVER. DEVELOP. DIRECT.

01 / SEE POSSIBILITY BEFORE PROOF

We look for curiosity, trajectory, and capacity to grow, not just polished achievement.

02 / TURN IDEAS INTO ACTION

Ideas only matter when they survive questioning, building, testing, and real-world use.

03 / RAISE STANDARDS, BUILD MORE LADDERS

We keep expectations high and reinforce support so hard growth can actually happen.

04 / OWN WHAT HAPPENS NEXT

We do not blame conditions. We choose the next meaningful action.

05 / LET TRUTH REVISE US

We treat beliefs as hypotheses and update quickly when evidence changes.

BECOME MORE.

You Are Meant to Become More.

Too many capable builders
never become founders.

They can build.

They just do not yet have a

clear path from product
to paying customer.

Bayes exists to close this gap.

A SERIOUS FIRST ATTEMPT.

REAL ENOUGH TO TEACH

Working with real people, real needs, and real money, so every lesson feels alive.

RIGOROUS ENOUGH TO MATTER

Pushing you to think clearly, move quickly, and make decisions you can stand behind.

BOUNDED ENOUGH TO SURVIVE

Giving you the space to learn, build, and grow without putting everything at risk too soon.

40
WEEKS OF GUIDED EXECUTION

200
GUIDED LIVE HOURS

5
LIVE HOURS PER WEEK (PART-TIME)

0%
EQUITY DILUTION

Hybrid part-time model. Direct founder tables. Zero cap table interference.

WHO IS THIS FOR?

01 / PRODUCT & SOFTWARE ENGINEERS

Engineers building software systems with a strong bias toward shipping.

02 / STEM BUILDERS

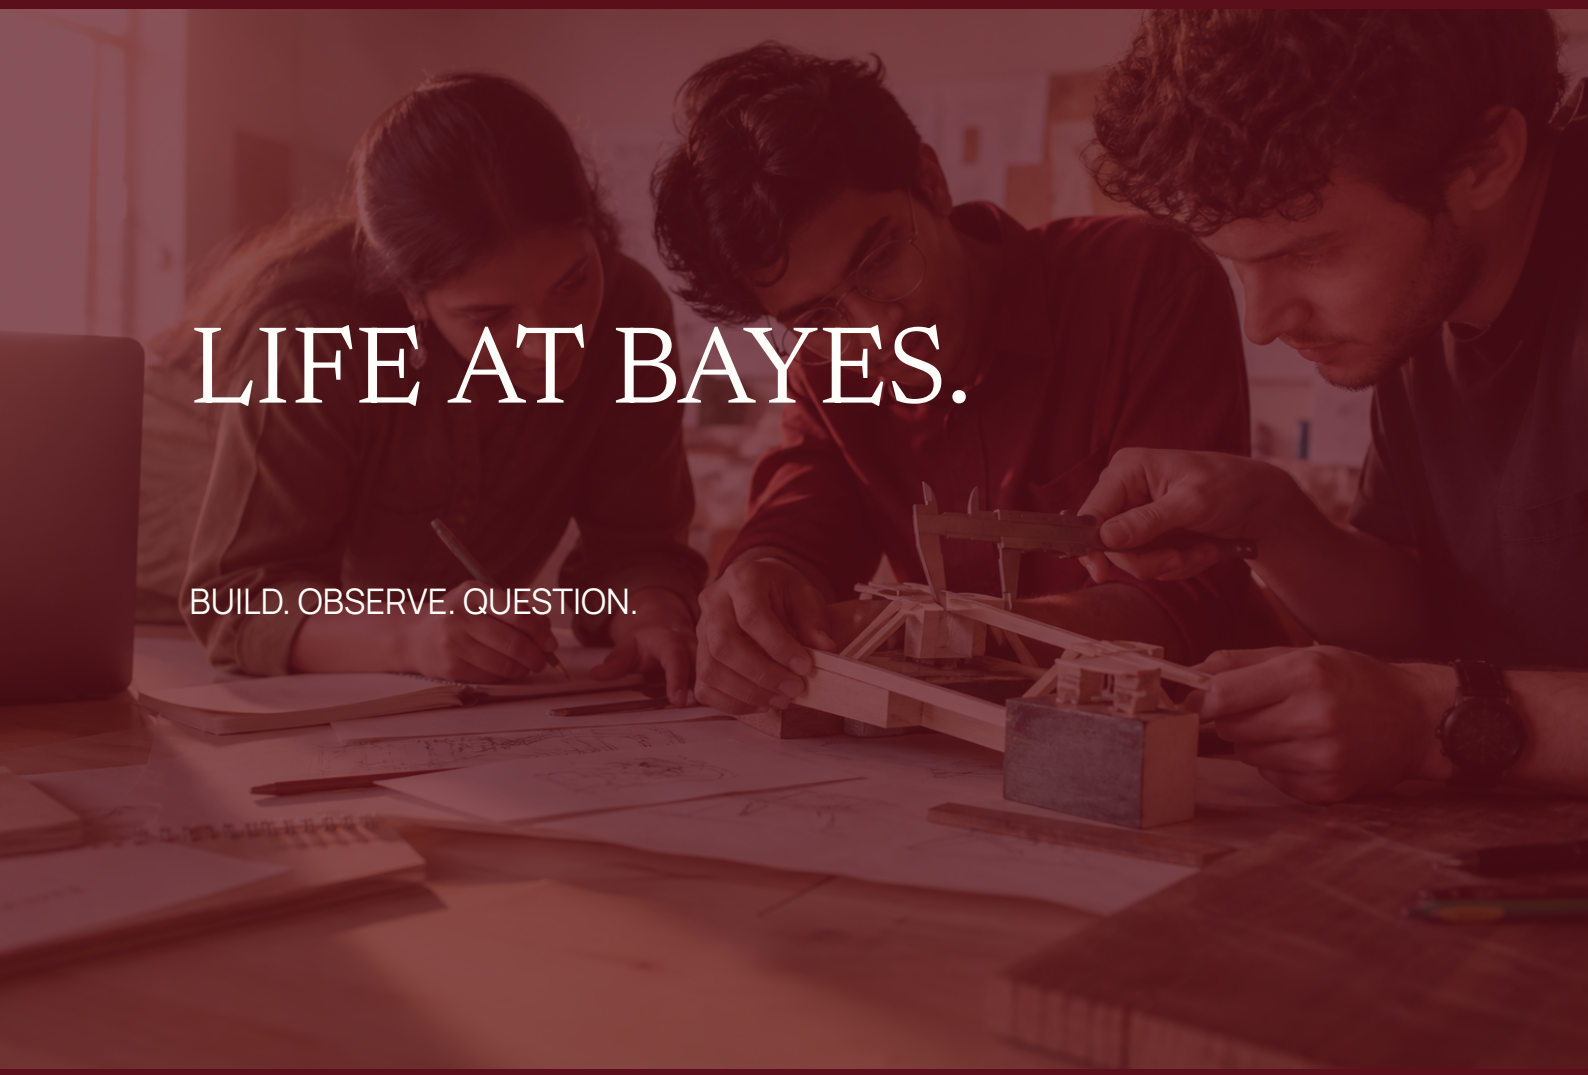

Students or graduates in science, math, and technical fields building real tools.

03 / FINAL-YEAR ENG STUDENTS

Students ready to transition from classroom assignments to serious building.

04 / AMBITIOUS TECH FOUNDERS

Builders from adjacent backgrounds serious about creating tech companies.

LIFE AT BAYES.

BUILD. OBSERVE. QUESTION.

SINGLE WEEKLY VENTURE MISSION

Each week is built around a single action mission. The work begins before the theory, so the lesson arrives only after the friction is real.

7-DAY OPERATIONAL CADENCE

Wed: Mission Briefing & V1 Prompt

Thu: Unguided Naive V1 Sprint

Fri: Theory, Frameworks & Pre-Reads

Weekend: V2 Production Upgrade

Mon: Osmotic Learning & Sync

Tue: Backlog Clearance & Outreach

The first draft comes first. Then the deconstruction. Then the upgrade.

Founders execute Version 1 before receiving theory. After Friday's live teardowns and frameworks, they rebuild Version 2 over the weekend. The delta between Version 1 and Version 2 is the visible proof of learning.

THURSDAY / NAIVE V1 SPRINT

Raw intuitive attempt written or coded under real constraints without external theory.

WEEKEND / V2 PRODUCTION BUILD

Upgraded production-grade asset informed by Friday frameworks and live mentor critique.

DISSECT REAL SYSTEMS AND OPERATOR FRICTION.

Every mission begins with a hypothesis and ends with evidence. Fellows interrogate ground-level operational workflows, calculate the cost of doing nothing, and validate market demand.

UNVARNISHED DIAGNOSTICS. NO PERFORMANCE.

Diagnostic clinics, peer pods, and live product teardowns replace performative presentations. Fellows discuss customer pushback, pricing friction, and operational bottlenecks openly.

MONDAY DIAGNOSTIC CLINIC

2-hour live session bringing the cohort together to stress-test evidence, teardown V2 builds, and calibrate next steps.

SHOW WHAT FAILED. SHOW WHAT CHANGED.

Instead of vanity metrics, fellows present invalidated assumptions, unexpected customer behavior, and code or copy discarded to move forward.

REVEAL DAY SPRINT

Transparently narration of what initial thesis assumptions proved wrong during execution, locking pitch habits before customer sales calls.

REAL OPERATORS. REAL NUMBERS. REAL DECISIONS.

UNIT ECONOMICS

Dissecting real spreadsheets, margins, CAC, and payback periods.

NEAR MISSES

Near-fatal mistakes, co-founder friction, and pivot moments.

BOARD ROOMS

What survival and commercial momentum actually require.

Guest founders and operators break down actual data, unvarnished spreadsheets, and strategic tradeoffs.

ONE FOUNDER. ONE ROOM OF QUESTIONS.

One founder presents their current stage of venture evidence. The cohort challenges assumptions, inspects user data, and forces key decisions into the open.

PEER INTERROGATION NORMS

Constructive, unvarnished peer review standards designed to surface hidden friction and sharpen venture conviction.

DEMO DAY & COMMERCIAL REVEAL.

Founders pitch battle-tested businesses backed by real evidence of customer pull, working software products, and verified unit economics to investors and domain operators.

GRADUATION STANDARDS

Graduation requires verified commercial pull: minimum ₹40,000 MRR or signed LOIs / paid pilot agreements.

THE 40-WEEK CURRICULUM BLUEPRINT

This curriculum is designed to build rigorous learning environments that equip people with the knowledge, courage, and agency to shape their lives and make a meaningful contribution to the world.

CONTINUOUS VENTURE ARTIFACT CHAIN

40 Weeks | Part-Time (5 hrs/wk) | 200 Guided Hours | 5 Execution Stages | 40 Action Missions

FIND THE PROBLEM

WK	VENTURE MISSION	THU V1 SPRINT	WEEKEND V2
01	**Map Personal Asymmetric Leverage & Founder Math** Why does startup risk work differently?	Write 1-pg Founder OS covering purpose & time budget	Upgrade Founder OS into production-grade asset
02	**Deconstruct Indian Demand & Sector Adoption** Where is India creating new demand?	Draft 3 venture hypotheses & target customer map	Upgrade hypothesis deck & revenue ceiling map
03	**Trace Ecosystem Money Flows & Bottlenecks** Where does money leak inside an industry?	Map sub-sector actors & money flows	Upgrade 2D Ecosystem Cartography asset
04	**Audit Ground-Level Workflows & Quantify Waste** Where does the real workflow break?	Interview 2 operators & map 5-step workflow	Quantify Cost of Doing Nothing for target pain
05	**Isolate Unfair Advantage & Target Idea Space** Where do you have the right to win?	Audit personal unfair advantage & select idea space	Map 3 adjacent pivot paths & buyer urgency
06	**Formulate Falsifiable Venture Thesis & Catalyst** Why this problem, and why now?	Write 1-pg thesis with why now & kill criteria	Execute Devil's Advocate thesis interrogation

SHAPE THE PROMISE

WK	VENTURE MISSION	THU V1 SPRINT	WEEKEND V2
07	**Define 10x Wedge & Initial Distribution Spec** What company are you actually building?	Finalize name/domain, ICP & 10x wedge spec	Upgrade GTM spec & competitor teardown
08	**Eliminate Onboarding Friction & Minimize TTV** How do users reach value fast?	Map user task & low-fi wireframes for 10x feature	Audit time-to-value friction & onboarding cues
09	**Validate High-Fidelity UX via Guerrilla Testing** Does product make sense before code?	Build hi-fi prototype & run 3 guerrilla tests	Lock build-ready product spec & scope reduction
10	**Draft MVP Build Contract & Technical Backlog** What exactly should be built now?	Write user stories, acceptance tests & API surface	Lock front-end execution plan & issue backlog

BUILD UNDER PRESSURE

WK	VENTURE MISSION	THU V1 SPRINT	WEEKEND V2
11	**Deploy Initial Front-End & Demand Signal Capture** Can the market understand the promise?	Build component library & live landing page	Collect waitlist & demo request signal
12	**Engineer Core Database & Authentication Engine** Can product complete core job?	Implement auth, database schema & CRUD endpoints	Staging deployment & error log instrumentation
13	**Eliminate Technical Debt & Verify Integration** What must be cleaned before users see it?	Clear blocking bugs & stabilize API endpoints	Complete integration checklist & mentor check
14	**Execute Recorded Operator Reviews & Capture Signal** Would real operators use or pay?	Complete full-stack MVP & run 2 operator sessions	Log usage friction & commercial reaction
15	**Integrate AI Workflow Leverage & Budget Latency** Where should AI create real advantage?	Add 1 AI workflow & measure latency/cost	Compare against non-AI baseline & set fallbacks
16	**Pass Private Beta Gate & Onboard First 5 Users** Is beta ready for commitment?	Fix P0 bugs & instrument activation events	Onboard 5-10 highest-intent beta prospects

WIN REAL CUSTOMERS

WK	VENTURE MISSION	THU V1 SPRINT	WEEKEND V2
W17	**Craft Sales Story & Test Pricing Proposals** What promise will buyers believe?	Create 3-min demo narrative & proposal page	Run 10 real sales conversations & log pushback
W18	**Conduct 5 Live Buyer Demos & Log Objections** Who cares enough to take a demo?	100 targeted touches & 5 discovery calls	Teardown call recordings & refine ICP focus
W19	**Ask for Commercial Commitment & Close Paid Pilots** Will anyone commit in writing or cash?	Run 3 pilot meetings with price & success criteria	Close paid pilot agreements or signed LOIs
W20	**Synthesize Sales Signal & Execute Bayesian Update** What did market teach you?	Write commercial update memo on buyer patterns	Execute Bayesian update on ICP & pricing
W21	**Drive White-Glove Onboarding & Achieve First Value** How to ensure immediate customer	Execute white-glove onboarding for pilot users	Measure time-to-first-value metric
W22	**Verify Quantifiable Customer Outcomes & Audit Telemetry** Is product delivering real ROI?	Audit usage telemetry & quantitative ROI	Document first verified customer success story
W23	**Instrument Repeat Usage Loops & Analyze Churn** Do users come back habitually?	Instrument retention telemetry & cohort tracking	Eliminate usage drop-off friction points
W24	**Build Founder Analytics Dashboard & Unit Economics** What numbers determine business	Build founder analytics dashboard & MRR tracker	Model unit economics & customer acquisition cost
W25	**Establish Weekly Team Operating SOPs & Cadence** How to run high-velocity operation?	Document core operational SOPs & issue workflow	Establish team sprint rhythm & KPI dashboard
W26	**Pass Public Launch Audit & Lock Launch Collateral** Is venture ready for public launch?	Audit system security, payments & messaging	Finalize launch collateral & media release

STAND ON EVIDENCE

WK	VENTURE MISSION	THU V1 SPRINT	WEEKEND V2
W27	**Execute Public Reveal & Mobilize Inbound Channels**	Execute public reveal & launch announcement	Mobilize social, community & press channels
W28	**Triage Launch Inbound & Convert Warm Pipeline**	Triage incoming leads & schedule demo calls	Convert warm pipeline into active trials
W29	**Run Outbound Sales Sequences to Strangers**	Launch cold outbound email & LinkedIn sequences	Optimize response rate & qualification flow
W30	**Activate Channel Partnerships & Referral Nodes**	Set up referral incentives & channel partners	Co-market with complementary software platforms
W31	**Negotiate Final Commercial Terms & Lock MRR/ARR**	Negotiate enterprise terms & billing schedules	Lock recurring MRR contracts & annual agreements
W32	**Onboard Paying Accounts & Prevent Custom Scope**	Standardize customer onboarding playbook	Deliver core value without custom code creep
W33	**Quantify Customer ROI & Ship High-Impact Fixes**	Publish quantitative ROI case studies	Ship feature requests requested by key accounts
W34	**Score Account Health & Proactively Manage Renewals**	Build account health scoring framework	Execute proactive 90-day renewal check-ins
W35	**Publish Verified Case Studies & Testimonials**	Record video customer testimonials	Publish customer teardowns & ROI documentation
W36	**Execute Truth Interrogation & Write Decision Memo**	Conduct internal metrics interrogation	Write 3-pg decision memo (scale, pivot, reset)
W37	**Harden Infrastructure & Prepare Operational Transition**	Perform security audit & DB optimization	Harden infrastructure for post-fellowship growth
W38	**Model 12-Month Financial Plan & Capital Strategy**	Build 12-month operating budget & cash flow	Determine bootstrapping vs fundraising plan
W39	**Build Diligence Data Room & Finalize Pitch Story**	Build data room (metrics, cap table, LOIs)	Finalize 3-min Demo Day narrative & deck
W40	**Deliver Live Demo Day Pitch & Execute Graduation**	Deliver live Demo Day pitch to VCs & operators	Execute graduation reset & join Alumni Network

What You Graduate With

Every fellow leaves with four non-negotiable artifacts of competence.

01 / FALSIFIABLE THESIS

Grounded opportunity thesis with clear market catalyst, target ICP, and kill criteria.

02 / DEPLOYED PRODUCT

Production-grade web/mobile application running live with telemetry and analytics.

03 / COMMERCIAL SIGNAL LOG

Documented buyer discovery transcripts, objection logs, and closed paid pilot contracts.

04 / PROOF SYSTEM

Verified GitHub history, benchmark runs, user metrics, and founder reference graph.

Clear promises. Clear limits.

We believe that trust is built through radical transparency. You should know exactly what Bayes is committed to, and exactly what Bayes will never do, before you apply.

WHAT BAYES DOES

Runs alongside college or work.

The fellowship is 5 live hours per week. You keep your full-time job or finish your degree.

Offers a refund window.

100% refund within 14 calendar days of Cohort Day 1, minus physical fulfillment costs up to ₹2,500.

Funds the Industry Expedition.

Travel, hotel, and meals for the 3-day expedition are fully covered by the institute.

Protects your IP completely.

Bayes claims zero equity, zero advisory shares, and zero IP rights over anything you build.

Transparent installment pricing.

Six monthly payment slots. No hidden fees. No predatory structures.

WHAT BAYES DOES NOT DO

Does not grant a degree.

Bayes is an entrepreneurial fellowship, not a degree-granting institution.

Does not guarantee placements.

We do not promise employment. We train founders. What you build is yours to decide.

Does not take equity or IP.

Zero equity. Zero advisory shares. Zero IP claims. Your company is entirely yours.

Does not partner with NBFC lenders.

We explicitly reject predatory debt financing. If you need aid, apply for a Bayes Scholarship Grant.

Does not admit everyone.

Selection is rigorous. We reject candidates who cannot commit time, intent, or honesty.

₹2,80,000

GST INCLUSIVE / TOTAL TUITION

₹5,000 seat confirmation deposit credited toward tuition. Six monthly payment slots across the 40-week program.

THE COST

Total tuition: ₹2,80,000 GST inclusive.

Net after 18% GST: ₹2,37,288.

Per live hour of instruction: **₹1,186.**

Industry Expedition: **Fully funded.**

Equity taken: **Zero.**

Degree granted: **None.**

THE RETURN

Rung 1 / Bootstrapped Seed:

₹50k–₹1.5L MRR in 12 months.

Rung 2 / Salary Jump:

+₹5L–₹15L LPA as Founding Engineer.

Rung 3 / Risk Shield:

Preserves ₹18L–₹25L in downside risk capital.

Cumulative 3-year upside:
₹20L–₹30L in net financial delta.

THE 10x PRINCIPLE

Paying ₹2.8L for a defensible ₹25L financial delta means tuition is literally 10% of value acquired. That is the arithmetic of leverage.

Talent should not worry about price.

Institutional grants and scholarships available for exceptional builders based on trajectory, commitment, and financial need.

GRANT CATEGORIES

50% Merit Scholarship: Allocated to top technical candidates.

Need-Based Aid: Evaluated during diagnostic interview.

How Admission Works

The selection funnel is rigorous. It is designed to find builders with the right trajectory, not just the right credentials.

1

EXPLORE THE HANDBOOK

Read the Founder Briefing. Understand the curriculum, the commitment, and whether Bayes is built for where you want to go.

2

FELLOWSHIP + SCHOLARSHIP APPLICATION

A multi-stage application: Technical Trajectory audit, Ambition essays, and optional scholarship aid request. Auto-saved. Complete asynchronously.

3

FOUNDER DIAGNOSTIC INTERVIEW

A 30-to-40 minute 1-on-1 with the founder. Come ready to present a 5-minute technical breakdown of something you built or a problem you are obsessed with.

4

OFFER LETTER + AID DECISION

Successful candidates receive an official offer with scholarship grant details and net fee. A Sponsor One-Pager is included for family alignment.

5

₹5,000 SEAT CONFIRMATION + ENROLLMENT

The ₹5,000 deposit locks your seat within 48 hours of the offer. It is credited toward your first tuition installment. Your cohort journey begins.

SELECTION STANDARD

We do not evaluate by institutional pedigree, corporate title, or salary.

We select for:

Practical systems competence.

Commercial courage.

Bayesian belief updating.

Time and solvency stability.

A candidate from an unranked college with high agency will be admitted over a credential-heavy applicant who avoids customer reality.

Are you founder material? FIND OUT.

Become More with Bayes Institute.
